

America Recycles Day Patch Activities For Grades K-2

Answer the following questions.

1. List at least three different ways to reduce or reuse paper:

- 1.
- 2.
- 3.

2. List six different items that can be recycled:

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.

3. Explain why it is important to reduce, reuse, recycle, and rebuy, OR older students may explain the difference between source reduction and reuse.

4. Name a way each of these items can be reused instead of throwing them away.

Cardboard Box _____

Plastic Milk Carton _____

Glass Jar _____

Wooden Board _____

Plastic Bag _____

Newspaper _____

5. Find out where your nearest recycling center is located and write the address below:

6. Find out what items are accepted for recycling at your recycling center.

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.
- 7.
- 8.
- 9.
- 10.

7. If you have curbside recycling at home, list what items are accepted:

America Recycles Day Patch Activities For Grades K-2

Complete THREE (3) of the following activities.

Activity 1

Answer the following questions.

1. List three ways you can help the environment in your community, at home, and at school.

- 1.
- 2.
- 3.

2. Visit one of the four following locations and describe your experience:

Landfill (Find out where our trash goes when we throw away)

Architectural Salvage Program: Significant Elements (Offer to volunteer for the program for a few hours and learn a lot!)

Recycling & Solid Waste Center (Find out what happens to your recyclables and go for a tour)

Reuse Store (Visit a local reuse center or thrift shop in your community)

Activity 2

Choose ONE (1) of the following:

1. Complete math problems, for appropriate grade, and show work.
2. The Coded Message! (Refer to additional packet.)

1. First Grade Math Problems

Tom has 10 cans. He takes six to the recycling center. Draw a picture and write a number sentence to show how many cans Tom has left.

Molly had eight pounds of newspapers. She took half of them to the recycling center. Draw a picture and write a number sentence to show how many pounds of newspapers were recycled.

Second Grade Math Problems

Kevin has 27 glass jars. Eleven of them are brown, four are green, and 12 of them are clear. The recycling center only accepts brown and clear glass for recycling. Draw a picture and write a number sentence to show how many glass jars Kevin can take to be recycled.

Sally and Dan are sorting their recyclables. They take the aluminum cans to the recycling center. The man at the recycling center pays them \$1.50 for their cans. They decide to share the money evenly. How much money does each person receive?

Activity 3

Choose ONE (1) of the following: Refer to additional packet.

1. Make Recycled Paper.
2. Create a "recycled" or "trash" art sculpture.

Activity 4

Choose THREE (3) of the following games: Refer to additional packet.

1. How Long Will it Last????
2. Maze 1 & 2
3. Word Search
4. Match the Raw Material to the Product
5. Sort, Recycle, Save!

Activities Packet For Grades K-2**

The Coded Message!

Solve the problem, then find the letter in the key that matches the answer and solve the coded message.

$11 - 9 = \underline{\hspace{2cm}} R$

$3 + 2 = \underline{\hspace{2cm}} C$

$8 - 2 = \underline{\hspace{2cm}} N$

$8 - 1 = \underline{\hspace{2cm}} S$

$9 - 5 = \underline{\hspace{2cm}} E$

$8 + 3 = \underline{\hspace{2cm}} U$

$4 + 4 = \underline{\hspace{2cm}} L$

$2 - 1 = \underline{\hspace{2cm}} Y$

$3 + 0 = \underline{\hspace{2cm}} I$

$7 + 2 = \underline{\hspace{2cm}} G$

$9 + 1 = \underline{\hspace{2cm}} F$

2 4 5 1 5 8 3 6 9

3 7 10 11 6

Making Recycled Paper

Materials Needed:

- Waste paper of various grades and colors (white or colored bond, construction, crepe, notebook)
- Screens - any window screen (nylon works the best), cut into the size of your choice (tape the edges for safety)
- Sponges and rags
- Blender
- Plastic tub or bucket
- Stack of old newspapers, divided into sections
- Additives (optional) - Dryer lint, seeds, feathers, string, dried flowers, etc. can be pressed into the pulp when pressing out the water.

Making the Paper:

1. About two 8 $\frac{1}{2}$ x 11" sheets equal one piece of recycled paper. Tear waste paper into small strips and tear small strips into small squares. Fill a blender about $\frac{1}{2}$ full with the paper scraps and then cover them with water (an inch or two past the top of the paper).
2. Run the blender on high until the contents are well blended and mushy. The wet paper pieces are called pulp, and the mixture is called a slurry.
3. Place the screen over the plastic tub and pour the slurry from the blender onto the screen. Shake the screen back and forth a bit to distribute the slurry evenly. Then, lift the screen up by spreading your hand underneath it, and let the water drain in the tub for a few seconds.
4. If you will be pressing items into the paper, add them now. Place another piece of screen over the paper pulp and press the two screens together between your hands, squeezing the water into the tub. Dab a sponge over the screen to help squeeze the excess water out.
5. Lay the screens enclosing the paper pulp on a section of newspaper. The newspaper will help absorb water out of the new piece of paper. With the sponge on top of the screen, press water out of the paper, flattening the pulp as you go. You can also use the edge of the sponge (or your fingertips) to shape the paper onto the screen.
6. When you have pressed most of the water out of your paper with the sponge, carefully lift off the top screen and, with a flat hand supporting the entire screen, hold the bottom screen with pulp as you turn the newspaper stack over, exposing the dry side. Set the screened unit, pulp side down, on the dry side of the newspaper stack.
7. Carefully peel away the screen from the new paper. Allow paper to air dry overnight or in a sunny place for a few hours.

Enjoy your recycled paper by using it to make cards, picture mats or other beautiful craft projects!

"Recycled" or "Trash" Art Sculpture

Directions:

- Use mostly recyclable or trash items to make your sculpture. Use as many recyclable items OR trash items OR any combination to create your art sculpture!
- Please limit the size of your sculpture to no larger than 2 x 2 x 2 feet.
- Please include a brief description, on separate sheet of paper, about the artwork including but not limited to; name of piece, materials used, what the piece represents or reflects, etc.).

Submitting Sculpture:

Please send your description and several pictures of your sculpture by Email, as attachments, to segan@tompkins-co.org, or by Mail to:

Tompkins County Solid Waste Management Division
Attn: America Recycles Day Patch Program
122 Commercial Avenue
Ithaca, NY 14850

How Long Will it Last????

Write Down How Long You Think The Item
Will Last Before It Decomposes (rots)!

Some answers are used more than once.

PICK FROM THE FOLLOWING

1 - 3 Months

10 - 20 Years

200 - 400 Years

1 - 5 Years

100 Years

More than 500 Years
